1 Problem & Solution

THE PROBLEM TODAY

- One-size-fits-all homepage for 50M+ daily users
- No memory of who the reader is or what they need
- 45–75 minutes wasted daily finding relevant news
- Users lose track of evolving stories — zero continuity
- Churn accelerating; ARPU growth has stalled

MY ET NEWSDESK SOLUTION

- AI-driven persona engine tailored to each professional
- Contextual assistant answers "what does this mean for me?"
- Smart summaries for rapid, layered comprehension
- Tracking Engine monitors stories + Daily Progress Report
- Every interaction makes the platform smarter

2 Feature Architecture

Hyper-Personalization Engine

Role-based personas (Investor, Founder, Executive, Student) dynamically rerank every story in real time using behavioral signals.

Contextual AI Assistant (IM-Mode)

Floating chatbot anchored to the current article. Answers professional-context questions without leaving the page.

Smart Summarization

3-tier depth system — Headline → Key Points → Full Analysis. Reduces per-article reading time by 40%.

Tracking Engine + Daily Report

Pin any story; AI monitors all related developments. Auto-generates a morning digest — habit anchor for daily returns.

3 The User Value Loop

DATA → PERSONALIZATION → RETENTION → MONETIZATION (SELF-REINFORCING)

Data Capture	AI Personalization	Better Experience	Habit & Retention	Monetization
Reads, clicks, dwell time, AI queries	Real-time ranking & context calibration	Right story, right depth, right time	DAU/MAU rises; churn drops sharply	ARPU lift + premium + B2B licensing

↺ Revenue reinvests into model training → richer data → stronger personalization → deeper moat

4 Quantified Impact — Back-of-Envelope

KEY ASSUMPTIONS (2026 MARKET BENCHMARKS)

- Digital news subscription growth: 5–8% CAGR
- Current Indian premium news ARPU: ₹2,400–2,800/yr
- Subscriber base modeled: 5M paid users
- Subscriber acquisition cost (SAC): ₹1,200–1,800/user
- 30–40% higher WTP for personalized content
- Industry churn baseline: 22–28% annual
- AI personalization platforms: +35–45% engagement lift
- Implicit time value of professional: ₹500–800/hr

Time Saved: Current unstructured reading: 60–75 min/day. My ET consolidation target: 25–30 min for same informational output. Weighted across user base = **47 min/week saved** (base case), equivalent to ~41 productive hours recovered per user annually.

WITHOUT MY ET

5M users × 24% churn = **1.2M lost/yr**

Re-acquire × ₹1,500 SAC = **₹180 Cr**

Foregone ARPU = **₹312 Cr**

Total Churn Cost: ₹492 Cr/yr

WITH MY ET

5M users × 18% churn = **900K lost/yr**

Re-acquire × ₹1,500 SAC = **₹135 Cr**

Foregone ARPU = **₹234 Cr**

Net Annual Saving: ₹123 Cr (Yr 1)

Revenue Driver	Current	My ET Target	Incremental Gain

Total Incremental Revenue	—	—	₹1,090 Cr/yr

Year	Subscribers	Blended ARPU	Gross Revenue	Net Incremental Gain
2026 (Baseline)	5.0M	₹3,200	₹1,600 Cr	—
2027 (Year 1)	5.4M	₹3,520 (+10%)	₹1,900 Cr	+₹342 Cr
2028 (Year 2)	5.8M	₹3,900 (+22%)	₹2,260 Cr	+₹752 Cr
2029 (Year 3)	6.3M	₹4,224 (+32%)	₹2,660 Cr	+₹1,223 Cr
2030 (Year 4)	6.8M	₹4,420 (+38%)	₹3,005 Cr	+₹1,601 Cr
5-Year Cumulative	—	—	—	₹5,873 Cr

5 ROI Verdict

TOTAL INVESTMENT (3-YR)	5-YEAR NET REVENUE GAIN	ROI MULTIPLE
₹113 Cr	₹5,873 Cr	52×
Infra + Engineering + GTM	Conservative base case	Payback < 18 months

My ET Newsdesk is not an incremental feature — it is a platform transformation. The behavioral graph it builds over time creates switching costs, a B2B licensing surface, and a habit loop that static news platforms structurally cannot replicate. The risk of inaction — continued ARPU stagnation and accelerating churn — is materially larger than the risk of execution.

All figures are estimates. Results will vary with execution quality.
